

StabilBlot™ Milk Blocker-10X

Product insert

Product number:

SB04-0015-01 (15 mL)
SB04-0125-01 (125 mL)
SB04-1000-01 (1000 mL)

Product use:

StabilBlot™ Blocker Family enhances sensitivity and minimizes background in blotting applications. We offer a range of options, both protein-based and synthetic-based, to block non-specific binding as well as enhance sensitivity when used as a blocker and antibody diluent.

Product stability, storage and specifications:

Product stability	Stable for 3 years from date of manufacture
Storage	Product should be stored at 2-8°C
Specification	Protein: Milk Product Buffer: Borate 10X pH: 5.50 ±0.50 1X pH: 7.60 ±0.50
Notes	Please note that Surmodics™ products are shipped to customers at ambient temperature. Extensive stability studies have shown that prolonged storage at ambient temperature will not affect the product quality or efficacy.

Recommendations for use:

Aseptically pour off the desired volumes of material needed for the application and allow the product to equilibrate at room temperature prior to use. To make a working strength blocking solution dilute one part StabilBlot Milk Blocker-10X with nine parts deionized water. Mix well.

The following are general guidelines only.

- 1) Remove the membrane from the transfer apparatus.
- 2) Add enough working strength StabilBlot Milk Blocker to cover the membrane and incubate at room temperature for 30-90 minutes with agitation.
- 3) Continue Western blot according to the standard assay protocol. It is also recommended to use working strength StabilBlot Milk Blocker for primary and secondary antibody dilutions.
