

Product number:

SZ03-CF02-0050 (50 mL)

SZ03-CF02-1000 (1000 mL)

SZ03-CF02-2000 (2000 mL)

Product use:

StabilZyme™ conjugate/protein stabilizers protect the entire conjugate by preventing the loss of catalytic activity and maintaining the structural integrity of the protein in solution. These stabilizers allow for the storage of conjugated proteins at lower use concentrations, extended shelf life and increased signal-to-noise ratios for improved assay performance.

The StabilZyme SELECT Stabilizer-CMIT/MIT is a multi-purpose stabilizing solution designed to maintain the conformation of antibody/antigen conjugates, antibody coated particles and unmodified proteins that are commonly used in immunoassays. Adding the conjugate/protein directly into the SELECT Stabilizer allows for stable storage of the conjugate at a working concentration and eliminates the need for subsequent dilutions.

Product stability, storage and specifications:

Product stability	Stable for 2.5 years from date of manufacture
Storage	Product should be stored at 2-8°C or at room temperature
Specification	Protein: Bovine Product Buffer: None pH: 6.5-7.5 Preservative: 0.00144% CMIT/MIT
Notes	Please note that Surmodics™ Stabilization Products are shipped to customers at ambient temperature. Extensive stability studies have shown that prolonged storage at ambient temperature will not affect the product quality or efficacy.

Recommendations for use:

Aseptically pour off desired volumes of material needed for the application and allow the product to equilibrate at room temperature prior to use.

The following are general guidelines only.

- 1) Use StabilZyme SELECT Conjugate Stabilizer-CMIT/MIT at 100% concentration for optimal stability and performance.
 - If necessary, adjust the pH of the solution to align with the properties of the protein for optimal performance.
- 2) Dilute the conjugate/protein/antibody coated particles to a working concentration in the StabilZyme SELECT Stabilizer-CMIT/MIT solution.
- 3) Use the diluted conjugate/protein solution according to the standard assay protocol.
- 4) For optimal performance, store the conjugate solution at 2-8°C and protect from direct exposure to light.
