

QUALITY CONTROL CERTIFICATE

Cat. No. MAB105P
Monoclonal Antibody to Human Chorionic Gonadotropin- Intact (hCG)

Category	Antibody to human hormone
Host	Mouse
Identification number	BCI150
Immunogen	Intact Chorionic Gonadotropin hormone purified from human urine.
Immunoglobulin class	IgG1 κ
Specificity and Cross-Reactivity	Specificity and cross-reactivity is determined by indirect ELISA against the peptide hormones listed. A control lot of MAB105P is included in each assay for comparison.
Purification	Raw ascites made at MBS is applied to a Protein A affinity chromatography column. The antibody is eluted from the column at pH 5.0 and is buffer exchanged into PBS, pH 7.6. The purified antibody solution is sterile filtered prior to vialing.
Isoelectric point range	6.25-6.75
Lot Number	
Percent Purity:	determined by Size Exclusion Chromatography
Concentration	
Buffer	0.15M PBS
Preservatives	None
Expiration date	
Quantity	
Volume	
Applications	EIA, Western Blot
Storage	Must be stored at 2°C to 8°C
