

ANTI-COXIELLA BURNETII MOUSE MONOCLONAL ANTIBODIES

Host	Mouse
Applications	Lateral Flow, ELISA
Isotype	BBI160 – IgG ₃ BBI162 – IgG ₃ BBI163 – IgG _{2b} BBI214 – IgG _{2a}
Immunogen Strain	Coxiella Burnetii

About Coxiella

Coxiella refers to a genus of Gram-negative bacteria in the family Coxiellaceae. Coxiella burnetii is the only member of this genus. It is an obligate intracellular bacterial pathogen, and is the causative agent of Q fever. Q Fever is an infectious possible biological weapons agent that in its spore-like form is resistant to heat, pressure, drying and certain antiseptics.

Available antibodies	BBI160 BBI162 BBI163 BBI214
-----------------------------	--------------------------------------

Antigens detected	Coxiella Burnetii
--------------------------	-------------------

Coxiella Burnetii Antibody Origin	The Hybridoma cell line secreting this monoclonal antibody was generated at Dstl Porton Down (A UK Government Agency: Defence, Science and Technology Laboratory). This monoclonal antibody is manufactured and sold under licence from Ploughshare Innovations Ltd on behalf of the Secretary of State for Defence.

Why BBI Solutions?

BBI Solutions can supply an extensive selection of antibodies for the detection of biothreat agents, explosives and infectious diseases. A number of these antibodies are sold under licence from the UK Secretary of State for Defence.
